GENERAL INFORMATION:
APPLICANT: The Procter & Gamble Company
APPLICANT: Infort, Mobert J.
TITLE OF INVENTION: Methods for Identifying Compounds for Regulating Muscle Mass of TITLE OF INVENTION: Punction
TITLE OF INVENTION: Punction
TITLE OF INVENTION: Punction
TITLE OF INVENTION NUMBER: US/60/474,733
CURRENT APPLICATION NUMBER: US/60/474,733
CURRENT FILING DATE: 2003-05-30
NUMBER OF SEQ ID NOS: 353
SOFTWARE: PatentIn version 3.2
SEQ ID NO 338
LENGTH: 1814
TYPE: DNA
ORGANISM: Homo sapiens
                                                                                                                                                                                                                                                                                                                                                                                                ò
                                                                                                                                                                                                                                                                                                                                                                                                                                                220

1st strand cDNA was primed with a NotI-oligo(dT) primer. Five prime end enriched, double-strand cDNA was digested with Not I and cloned into the Not I and EcoR V sites of the pCMVSPORT 6 vector. Library was normalized. Library was constructed by Life Technologies, a division of Invitrogen.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Submitted (20-JUL-2004) Genoscope - Centre National de Sequencage: BP 191 91006 EVRY cedex - FRANCE (E-mail : seqref@genoscope.cns.fr - Web : www.genoscope.cns.fr)

1st strand cDNA was primed with a NotI-oligo(dT) primer. Five prime end enriched, double-strand cDNA was digested with Not I and cloned into the Not I and EcoR V sites of the pCMVSPORT 6 vector. Library

COMMENT 1st strand cDNA was primed with a NotI-oligo(dT) primer. Five prime end enriched, double-strand cDNA was digested with Not I and cloned into the Not I and EcoR V sites of the pcMvSPORT 6 vector. Library was normalized. Library was constructed by Life Technologies, a division of Invitrogen.  FEATURES  1. 1754  Cource //organism="MRNA"  //db xref="taxon:9606" //db xref="taxon:9606" //clone="CSODIO367H19" //tissue type="Placenta Cot 25-normalized" //plasmid="pcMvSPORT_6"	Query Match     36.1%; Score 814.8; DB 3; Length 1754;       Best Local Similarity 73.4%; Pred.
